VIRTUAL INDUS

Production and Maintenance

virtual-indus.mimbus.com

With **VIRTUAL INDUS Production and Maintenance**, place your trainees in a realistic virtual room in which they can practice how to handle equipment, and how to monitor and adjust a production line.

The system will also provide you with follow-up and progress-control tools, to evaluate your trainees' activity and test their skills.

BENEFITS

- Significantly cut your training costs
- Strongly reduce the accidents' risks
- Increase your trainees' practice time
- Fully customize each trainee's learning path
- Increase your training attractivity with a playful solution
- Evaluate your trainees' competencies acquisition in real-time

LEARNING STEP BY STEP

Each step corresponds to a different training module and offers you several exercises sequences to train your students in piloting a production line or in the maintenance of a dispensing cell, in a totally safe way.

AN EFFICIENT FOLLOW-UP OF YOUR TRAINEES' LEARNING

Before each exercise, the trainee chooses a difficulty level that determines the guidance conditions: the higher the level, the more autonomous the trainee has to be in the tasks' execution.

Once completed the exercise, the intelligent follow-up system embedded in VIRTUAL INDUS Production and Maintenance provides you with a performance report based on:

- ▶ The exercise execution time
- ▶ The safety instructions compliance
- ▶ The equipment choice relevance
- ▶ The theoretical knowledge (MCQs)

This unique-in-the-world tool will as well allow you to follow-up and control in real-time the acquisition of your trainees' competencies. You will be able to create users' profiles and groups, to build your own learning paths and exercises, to place each trainee in front of the elements that you defined for him/her.

TECHNICAL CARD

HARDWARE	
PC	Labelled VR Ready
Immersive 3D headset	HTC Vive + 2 joysticks 3D Vive + sensors
Min. floor space	6m ² (64.6 ft ²)
